\* \* \* NEWS LETTER \* \* \*

Dear Customer,

Thank you for purchasing our Time Kit. If you have used the Time Kit before, you will notice some changes to the Micro-Watch Real Time Clock Card. Unlike the original Micro-Watch, the new Card is compatible with both American and European versions of the Apple //, Apple // +, and Apple //e Computer Systems. The new Card is also fully compatible with the original and will work with all the same software.

## SOFTWARE AVAILABLE FOR THE MICRO-WATCH.

### 1.) Pascal Subroutines.

A collection of utilities for Reading and Writing to the Clock and updating the Date on the Directory etc.

### 2.) Paralax Clock Displays.

Ten very different ways of displaying the Time. Ideal for Receptions, Store Displays, Impressive Demonstrations etc. Includes - Ball Clock (moving balls form the time), Sun Clock, Moon Clock, International Time etc.

### 3.) Dos Date Stamper.

This Program automatically adds the Time and Date to a DOS File Name when the file is being saved on disk. The program is part of DOS and is totally transparent to the user.

## COMING SOON.

### ProDos Clock Driver.

This will enable the new ProDos Operating System for the Apple //e to read the Date and Time from the Micro-Watch.

## Price List

Pascal Subroutines	16.50	64K 80 Col.Card	89.00
Paralax Clock Displays	16.50	8 Channel I/O Card	59.00
