Another fine product from our **Living Chess Library™**...

The King's Indian Defense (4.e4 lines)

by *Edward A. Chang, Expert,*
United States Chess Federation (USCF) and
Peter Biyiasas, Grandmaster,
Fédération Internationale des Échecs (FIDE)

This is a complete and very deep analysis of one of the most popular openings in chess. It includes some original analysis by Grandmaster Biyiasas that is revealed here for the first time, as well as the best existing analysis compiled from many sources. You can spring these lines on even the most advanced players. Also includes:

The Coffeehouse Chess Monster™

When you want to test your new knowledge against an opponent or just play an entertaining game, a single keypress calls the *Coffeehouse Chess Monster™* chess opponent program. The "Monster" will automatically set up the position you were viewing in the tutorial or offer you a new game. It is a fully-featured chess opponent program, with 9 playing levels and all the features you'd expect to find in a championship level program. Better than Sargon III™ or Chessmaster 2000™. And best of all, it is included FREE with every tutorial!

INSTRUCTIONS

All You Need To Know

1. **Diskette Side 1 is the program disk.** Insert it into the disk drive and turn the power on.
2. **The Title Page will then come up and ask you to insert the Data Disk.** Take out Side 1 (the Program Disk) and insert SIDE 2, SIDE 3, or SIDE 4 (the Data Disks). Then hit RETURN, and Board 1 will appear. When it does, hit "i" for the complete, on-screen instructions for viewing the tutorial. If you forget them at any time, you can just hit "i" to see them again.
3. **The COFFEEHOUSE CHESS MONSTER[®] has its own instructions.** You can see them by hitting "?" once you get to it. You can get to the MONSTER by hitting "*" from within the Whitehead tutorial.

In addition to the on-screen instructions, there are two things that you need to know about making moves in the opponent program:

Castling — Just move the King two squares. The Rook will be moved automatically.

Pawn Promotion — Add a slash and the piece you want the Pawn to become. For example, e7e8/q promotes the Pawn to a Queen while e7e8/r promotes it to a Rook.

THIS IS ALL YOU NEED TO KNOW For your convenience, however, we have added a printed version of the on-screen instructions on the following page.

To View the Tutorial

(These instructions can be called anytime by hitting "i")

At any Board there will be a flashing cursor next to the words "Hit Choice" or "Hit Cursor".

"Hit Choice" means that you should type a number (1-9).

"Hit Cursor" means that you should hit the Right arrow to go forward one move, or the Left arrow to go back one. If you hit the Left arrow when you are at the Board's first move, you will go up to the "parent" of that Board.

Hitting "Ø" (zero) at any point will take you back to the previous "Hit Choice" point.

Hit "x" to Flip the Board. Now you can see the pieces from your opponent's point of view.

Hit "+" to Get to the Express Depot. From there you can jump to any Board on the disk just by typing its number.

Hit "" to Play the Coffeehouse Chess Monster[™]. It will set up the tutorial position you were viewing, or offer you a new game. Once there, hit "?" for the Monster's help menu.

Hit "i" to Review these Instructions from any Board position.

The Maps: These help you to know where you are as you drive around the tutorial data base. We suggest that you make copies of the maps, and then mark off on the copies the places you have visited in the data base. This will help you to see where you have been, and where you should go next.
