How to Use This Troll Micro Mystery

To get the maximum results from this Troll Micro Mystery:

- Students should first read the book, *Mrs. Wigglesworth's Secret*.
- Then students should complete the learning activities on the micro-software program disk. These activities are designed to help students learn to draw logical conclusions based on information they have read.

About the Software

The games on the program disk are entertaining. They also help students strengthen important reading and thinking skills. What's more, students can return to the program again and again—having fun while they learn.

While the games may be played in any order, the first one is based on the book, and should be played after reading the book. Instructions are provided on screen where needed, and additional help may be obtained while any game is in progress by pressing the CONTROL and H keys simultaneously.*

Getting Started

Insert the program disk into the disk drive with the label facing up and the oval cut-out facing away from you. Close the door on the disk drive and turn on the monitor and computer. The red light on the disk drive will light up as the program loads.

Note: Some Apple computers require that PR#6 be typed before the program begins loading.

When the program has loaded, the Troll logo will appear, followed by the title frame. Then you will be asked to enter your name, and whether or not you want sound. When the game menu is displayed, select the game you want to play by pressing the indicated key. That game will automatically load and run.

During the game, the sound may be turned off or on by pressing the CONTROL key and the letter O key simultaneously.*

Micro User's Guide

When you have finished playing the game, you may play the same game again, or return to the game menu to choose a different game. Whenever the game menu is displayed, a different student's name can be entered by simply pressing the N key.

Note: To stop any game that is in progress or to return to the game menu, press the CONTROL and X keys simultaneously.*

REMEMBER: CONTROL-H calls for Help.
CONTROL-O turns the sound On or Off.
CONTROL-X stops a game that is in progress or returns you to the game menu.

*There may be a slight delay after pressing CONTROL-H, CONTROL-O or CONTROL-X.

The Micro-Software Activities

There are five learning activities on the micro-software program disk. Each activity provides practice in drawing conclusions based on the information presented in a brief paragraph. The activities are:

1. **MRS. WIGGLESWORTH'S SECRET**
2. **SCIENCE**
3. **NATURE**
4. **HISTORY**
5. **FAMOUS PEOPLE**

The play in all five games is similar. First, read the paragraph that appears on the screen. Then choose the best conclusion from the three sentences shown.

After the correct answer has been given, a new paragraph will appear on the screen. Each game contains 10 paragraphs.

Note: After one wrong answer, you get a second try.
After two wrong answers in a row, the answer is provided.

SCORING: 5 points for each correct answer on the first try.
3 points for each correct answer on the second try.
Maximum score in each game is 50 points.

Care of Disks

The micro-software program is recorded on the magnetic coating of the program disk, which is permanently sealed inside a protective cover. Do not touch the surface of the disk that is visible through the oval cut-out in the protective cover. When the disk is not in use, it should be returned to its own envelope and stored in a safe place away from dust, magnetic fields, and temperature and humidity extremes. Do not bend, staple, or write on the disk or its protective cover with ball-point pen or pencil.

Warranty

Troll Associates provides a lifetime guarantee on Troll micro-software disks. If this program disk is accidentally damaged or ever fails to load or run, simply return it to us for a free replacement.
