******NEXT MEETING WEDS DEC 13th 7:30pm Computerland********
......TOPIC FOR EVENING: HOW TO CREATE AND PIOT SHAPES IN HIRES...
NOVEMBER $8 T H$ USER'S GROUP MEETING

1. Meeting was attended by 10 users and 2 prospective users.
2. Some discussion on PASCAL
3. Request made for volunteers to lead selected topic discussions on meeting nights.
4.No discussion on Business applications.
4. Chuck Thiesfeld made an excellent presentation on how an APPLE can communicate with other Computers. or Terminals. Using a High
Resolution graphic display as a visual aid, he talked in easy to understand language about:-
```
-Modems
-Bit representation
-Half/Full duplex
```

-Serial Transmission
-Tones used in transmission

He then gave an actual demonstration of connecting an APPLE to a remot computer via a modem and the telephone network. The APPLE was equipped with the APPLE Communication Interface card. Chuck said that the documentation is good enough to allow the average APPLE user to succesfully communicate with other Computers or Terminals.
6.Bill Weldon of Computerland informed everyone that
(a) APPLE Disks were being delivered
(b) APPLE II computer demand exceeded the capability of APPLE to produce and long lead times were being quoted for delivery of systems. However Computerland expects to receive a large quantity of APPLES which were ordered before the demand build up.

## ERRATUM

In the October Newsletter, page 2, Graphic Display of large letters and Numbers, the sign was inadvertantly left out of the expression

C MOD 2> 0
which appeared as
C MOD 0

USER CONTRIBUTED PROGRAMS - MORE DETAILS
The following is a brief overview of some of the user contributed programs as viewed by this author.

KINGDOM

TWOVOICE

SAUCER

ADVANCED DRAGON

MIDWAY

BATTLESHIP

SPELIING BEE

You are the King of a land with certain assets such as acreage on which to grow crops. In an interactive conversation with the computer those assets are utilized as you see fit. The program then projects your efforts into the future and provides an evaluation.

An impressive demonstration of multitone music through the apple speaker.Some classical pieces are played.

This is very popular with my kids. Its a game for two players each controlling the movement of a 'flying saucer'. The paddles $0 \& 1$ allow the saucers to move up and down the left and right edges of the screen respectively. The paddle buttons fire phasars in a horizontal direction. The center of the screen is filled with randomly placed moving stars which will block the phasar beams. A hit on the opponent's saucer depletes his energy by 200 units. First player to go to zero energy, loses. Sound effects are good.
A realtime version of Dragon Maze in which the dragon advances to 'get you' without any pauses.
Better than average plane v. ship battle.
A LORES United States aircraft carrier (a/c) occupies most of the lower part of the screen. Plane flies across screen with bomb. Button on paddle releases bomb . Bomb knocks out a piece (one square) of carrier. The object is to make a hole through to water-line. Twist is that a/c puts up ack-ack fire at altitude of plane. One must continuously change altitude to avoid being shot down. Paddle is used for this purpose.
Apple version of Milton Bradley game BATTLESHIP in which an enemy naval force occupies unknown positions in ocean. Ocean is represented by a grid map. You fire 'shells' at grid position at which you guess his ships to be. Computer tells you if you have a hit.
Program written by this author-so report is biased : This is a CAI (computer aided instruction) Spelling program. The teacher or student enters 16 words for which the spelling is to be learned. The words are voiced to the student from a tape recording or person(later by Appletalker :.). The computer checks the spelling and scores the student. On the 3rd try the student must get each letter right before the next letter may be entered. LORES graphics with extra

```
USER CONTRIBUTED PROGRAMS - MORE DETAILS (Continued)
```

SPELLING BEE(Continued) large letters and music accompanyment make the spelling test interesting for the student. My daughter ( 9 years old) uses itso it is KID-TESTED. NOTE MUST ENTER HIMEM:16384

## SOFTWARE FOR APPLES- SUMMARY OF ADVERTISEMENTS

IN NOV-DEC CREATIVE COMPUTING.
The following is a summary of those advertisements which pertain to software _- specific to Apples. If you want more details, refer to the advertisements in question.

| Page <br> No | Company Advertising | Item $\quad$ Cost |
| :---: | :---: | :---: |
| 19 | Southeastern Software | Demo tape with 1 game <br> \& 2 programs |
| 26 | Quality Software | FASTGAMMON: 16 K 20-Tape <br> Backgammon 25-Disk |
| 47 | Personal Software | Mickchess 20 <br> Bridge Challenger 15 <br> Stimulating Simulations 15 <br> (10 programs)  |
| 93 | MICROTRONIX | Dimensional Maze (16K) 45 <br> HIRES Graphics Editor(16K) 18 <br> Statement renumber ( 8 K ) 10 |
| 97 | CREATIVE COMPUTING | $\left.\begin{array}{l}\text { ROCKET PILOT } \\ \text { Saucer Invasion } \\ \text { Star Wars ? } \\ \text { Dynamic Bouncer }\end{array}\right\}$ |
|  |  | Baseball, ,Horserace Slalom, Darts $\quad 8$ |
|  |  | $\left.\begin{array}{l}\text { Checker, Skunk, UFO } \\ \text { Blokade, Genius }\end{array}\right\} \quad 8$ |
|  |  | $\left.\begin{array}{l} \text { CAI programs:-US Maps, } \\ \text { Spelling,Math Drills, } \\ \text { Add with Carry } \end{array}\right\}$ |
| 102 | SOFTAPE | APPLETALKER(More on this 16 in next issue.Computerland can demo;so can I) |
|  |  | SOFTWARE EXCHANGE-for $\$ 20$ membership you can exchange programs at $\$ 2$ per tape of 1 to 9 programs. 10 programs currently available. |
| 133 | TRANS DATA CORP | Several commercial, ed \& 18 to 50 games. |

FLASH \& INVERSE IN INTEGER BASIC
In the Sept newsletter, the use of location 50 was explained. The following are details of what happens in the BASIC $I / O$ and how the information to be printed reacts with the contents of location 50 .

This is what happens to each character in a string when it is about to be printed using an INTEGER BASIC 'PRINT' statement.

The determination of whether a character is to print in NORMAL, INVERSE , or FLASH depends on the setting of the 2 high-order bits of each character as it resides in the pri buffer. The character displayed is entirely controlled by the value of the low order 6 bits of each character. In CONTACT \#3, a table of ASCII values was published. The displayed value is determined by using those ASCII values modulus 64:

| $\frac{\text { Bit } 6 \& 7}{00}$ |  |
| :---: | :--- |
| 01 | Function |
| 010 Flash |  |
| $10)$ |  |
| $11)$ | Normal |

Apple chose to implement a softrart function to control the mode of the displayed letters.

The following BASIC statements would perform the same function:
$10 \mathrm{CHAR}=\mathrm{ASC}(\mathrm{A} \$)$
20 IF CHAR $=159$ THEN CHAR $=160$
30 CHAR $=$ CHAR AND $\operatorname{PEEK}(50)$
40 IF CHAR $<=159$ THEN CHAR $=160$
50 POKE BUFFERADDR,CHAR

Continued on page 5.

MEETING NIGHTS:
Meetings have been scheduled for the 2 nd weds of each month. If a persons desire a different day of the month- please let the editor or Computerland know.

If you put characters directly in the print buffer with POKE commands or STA $s$, the cofuariwill be bypassed. Using the PRINT statement, the above described logic results in characters being treated as summarized below

| $\begin{aligned} & \text { INPUT } \\ & \text { CHAR } \\ & \text { VALUE } \end{aligned}$ | RESULTING OUTPUT ASCII VALUE |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | LOC 50 | 63 | 127 | 191 | 255 |  |
|  | BITS 6\&7 OF OUTPUT CHAR | 00 | 01 | 10 | 11 |  |
| $\begin{aligned} & 0 \\ & 10 \end{aligned}$ | Chars created by <br> normal keyboard action | 160 | 160 | 160 | 160 | Blank |
| $\begin{aligned} & 160 \\ & T 0 \\ & 191 \end{aligned}$ |  | $\begin{aligned} & 32 \\ & \text { to } \\ & 63 \end{aligned}$ | $\begin{aligned} & 32 \\ & \text { to } \\ & 63 \end{aligned}$ | $\begin{aligned} & 160 \\ & \text { to } \\ & 191 \end{aligned}$ | $\begin{aligned} & 160 \\ & \text { to } \\ & 191 \end{aligned}$ | Numbers \& Special Characters |
| $\begin{aligned} & 192 \\ & \text { to } \\ & 223 \end{aligned}$ |  | $\begin{aligned} & 0 \\ & \text { to } \\ & 31 \end{aligned}$ | $\begin{aligned} & 64 \\ & \text { to } \\ & 45 \end{aligned}$ | 160 | $\begin{array}{\|l\|l} 192 \\ \text { to } \\ 223 \end{array}$ | Letters |
| $\begin{aligned} & 224 \\ & \text { to } \\ & 255 \end{aligned}$ |  | $\begin{aligned} & 32 \\ & \text { to } \\ & 64 \end{aligned}$ | 96 <br> to <br> 127 | $\begin{aligned} & 160 \\ & \text { to } \\ & 191 \end{aligned}$ | $\begin{array}{\|l} 224 \\ \text { to } \\ 255 \end{array}$ | Numbers \& Special Characters |
|  | EFFECT | INV | FLASH <br> letters INVERSE numbers | BLANK letters | NORMAL |  |

An example of the application of this table is as follows:
Say you want to FLASH a number.1. It is necessary to create an ASCII 255 and store in a string using the technique described in CONTACT \#1. Then

POKE 50,127

## MICROCHESS

MICROCHESS is a chess playing program recently advertised in BYTE and other magazines. It is supplied in versions for the APPLE, PET and Radio Shack TRS-80. It is available mailorder or from Computerland (who can supply it faster and you save the cost of postage) for $\$ 19.95$. This writer and 7 other local users have already ordred it from Computerland after having seen the game in action.

The chess board is displayed in high resolution graphics and is very realistic. However the game is even more realistic! Unless you are close to being a Chess Master- be prepared to lose ! If that hurts your ego, there are 8 user selectable degrees of difficulty which can be set into the program :

LOCAL-USER CONTRIBUTED PROGRAM BANK
The bank now contains the following programs: **

KINGDOM
COLOREATER
SHAPEMAKER
FLY
TWOVOICE
POET
SAUCER
ADVANCED DRAGON
CHRISTMAS WREATH
MIDWAY
I DARE YOU
BATTLESHIP
EVIL (previously called RAMP)
CREATE SHAPE (Oct Newsletter)
SPELLING BEE

THESE PROGRAMS ARE
ALL AVAILABE FOR A
COPY CHARGE OF \$1
PER PROGRAM.
THIS MONEY IS USED TO DEFRAY COST OF PRINTING AND MAILING NEWSLETTER. PLEASE GET YOUR PROGRAM COPIES NOW. WE NEED YOUR SUPPORT TO KEEP THE MEWSLETTER GOING
** Reviews will appear periodically in this newsletter.
