

This file contains the modifications and the updates of TFB-Disasm since version 1.0.

05/94 Version 1.0.2

- Corrected bugs:
 - Operands of MVN and MVP instructions.
 - Simple quote in ASCII strings.

04/94 Version 1.0.1

- Corrected bugs:
 - Listing scrolling stop at offset \$00EF.
 - Deletion of the MX directives by the TC command.
 - Partially relocated OMF segments (bank-aligned, Finder-like).
 - PFX bug with empty volumes and pathnames like ".D1".
 - Errors/misses in TFBD.Data.
 - Bug of MATCH L with labels on constants.
 - Scripts: reset of IF in case of error.
 - Scripts: bug of Control-C in the debug mode.
 - Other internal bugs with no annoying consequences.
- Additions and changes:
 - Disassembly of Merlin LNK files.
 - CAT command display (file size of \$0 is not shown).
 - Truncation of labels (TRON / TROFF) set at load time to "on" (16b) with 1-segment files and to "off" with multi-segment files..
 - Improvements in the support of extension files.
 - Files configuration: type \$5A / \$8040 (because of conflict).
 - Default origin modified (ORG).
