Use the ROBOSYSTEM to originate your diagrams, layouts or plans, and ROBODATA for keeping record files on components and analysing complete drawings.

ROBODATA and the ROBOSYSTEM are easy to use and can be learnt in a matter of hours. Together they provide you with a sophisticated design and documentation package - at a very competitive price. Both operate with the same basic equipment, although ROBODATA requires the addition of a printer and an 80 column display card.

To see how ROBO software can ease your drawing workload and improve the overall efficiency of your business, DIAL 100 and ask for FREEPHONE ROBO. We'll be glad to give you further details and arrange a demonstration.
