

Vegas Craps™

By California Dreams™

Update for Apple® IIGS® version

The Apple IIGS version of Vegas Craps contains some variations not mentioned in the User's Manual.

Errata to page 14 & 15 of the User's Manual

Page 14: This is a correction to figure 3. The section of the table on which to place bets has been changed in order to accurately reflect the betting areas of a Las Vegas casino.

If you place an invalid bet, one that exceeds the limit for a bet or is not a proper multiple for a bet, an error message will appear. If you ignore this and try to roll the dice, the cursor will go back to the section of the table containing the invalid bet. You must change the bet so it is no longer invalid. To find out more about maximum betting limits and bets that must be placed in a multiple of a number, select the help feature and then select the area of the table on which the bet you would like information on is placed.

Page 15: The payoff for place bets is slightly different than stated in the manual.

For a 4 or a 10, the house pays 9 to 5.

For a 5 or a 9, the house pays 7 to 5.

For a 6 or an 8, the house pays 7 to 6.

These changes have been made to make the game identical to Craps as played in Las Vegas casinos.

Sound/Music Off Option

The IIGS version allows you to toggle the music or sound for the game on or off by using the M or S key. To turn the music or sound off, press the M or S key respectively. To turn either the music or sound back on, press the appropriate key again. Note, that these options will only work when the cursor (either the hand or chip) is displayed on the screen.

Removing a Chip From the Table

To remove the most recently placed chip from the table, press either the minus (-) key or the apple key along with the mouse button.

Exiting the Place/Buy Mode

To exit from the Place/Buy mode, click on the Place/Buy button at the bottom of the screen.
