

# **Vegas Gambler™**

## **By California Dreams™**

### **Update for Apple® IIGS® version**

The Apple IIGS version of Vegas Gambler contains some variations not mentioned in the User's Manual.

#### **Copy Protection**

The copy protection question in the program will refer to the User's Manual. Therefore, it is very important that you do not lose your User's Manual.

#### **Saving Your Stake**

Since the Vegas Gambler program allows you to save your stake only to the program disk (the disk used to load Vegas Gambler), we strongly recommend that you make a copy of the original disk and use that copy for loading the game. You will then be able to save your stake to this copied disk. The program will not allow you to save your stake to any other formatted disk.

#### **List Feature (BlackJack)**

The Black Jack game offers a List option which will display the cards that have been used in play. This option can be useful for would-be card counters who want to keep track of the cards still in play. Please note that the numbers that are displayed refer to all suits and not just hearts.

#### **Sound/Music Off Option**

The IIGS version allows you to toggle the music or sound for the game on or off by using the M or S key. To turn the music or sound off, press the M or S key respectively. To turn either the music or sound back on, press the appropriate key again. Please note that this option can only be invoked when the hand cursor is displayed on the screen.
