Exciting New Apple III Hardware & Software Information Inside

ON THREE

Presents...

The **Apple III**

512K Memory Upgrade

and

Low Cost - Highly Reliable
Floppy & Hard Disk Drives

and New Software

for your **Apple III**
or **Apple III Plus**

Micro-Sci A143 Floppy Disk

The A143 is an **Apple III** compatible disk drive that stores four times the information of a standard 140K drive. That's 560K of information on a single diskette. Up to three A143's can be attached to your **Apple III**, giving you up to one and three quarter megabytes of data on-line at all times! The A143 plugs directly into the back of your **Apple III** and does not require an interface card or power cord.

This drive can be used with all popular **Apple III** programs. Backup III, PFS, Visicalc, Quick File, III E-Z Pieces, Draw ON, Applewriter, Word Juggler and all the others will work with the A143 drive. If you have ever run out of room on a regular 140K drive when trying to store a large Visicalc or III E-Z Pieces file, the A143 will meet your needs without costing you an arm and a leg.

If you have a ProFile hard disk you will no doubt curse every time you have to do a back-up. Using the standard Apple drive you are in for a good two or three hours of shuffling disks in and out of the drive. Make sure that you have enough diskettes because you will need up to 40. By using the Micro-Sci A143 drive you will only need a maximum of 9 or 10 disks and an hour or so to back-up your hard disk. The A143 is a time-saver that YOU need!

Micro-Sci A143 Floppy Disk

Capacity: 560K
1120 Blocks
573,440 Bytes

Price: Now Only \$339

Effective August 23, 1985, the price of the A143 will rise to \$399 + shipping. Buy yours now at the low price of only \$339.

*Includes a
6 month warranty!

Trustor 10H/30 Hard Disks

If you're looking for a hard disk drive for your **Apple III**, chances are you are discouraged by both the high prices and low capacities. **ON THREE™** has a set of hard disks for the **Apple III** that you will love! We offer both a 10 and 34 MegaByte hard disk for your **Apple III**. Faster than most other hard disks, these drives are priced hundreds of dollars below the cost of similar drives on the market. Both drives work with **ALL Apple III** programs. You can even use them with Selector III™ or the Catalyst™ program selector. Backed with a full 1 YEAR warranty, these drives are the best buys on the market. They even support the **Apple II**, **IIe**, and **IBM PC**.¹

The **Trustor 10H** is a half height hard disk drive for the **Apple III**. One of the great features of our **Trustor 10H** (besides the low price!) is the ability to connect another 10H onto the back of your first one! You can have over 20 MegaBytes of fast hard disk storage available. You can even use the second one to back-up your main drive and take it home with you each night. The second **Trustor 10H** is priced at only \$899 if bought separately. For a limited time you can order both the main 10H and the second 10H for only \$1848. That's **fifty dollars off** the regular low price.

	Trustor 10H	Trustor 30
Average Access:	(Apple ProFile's speed = 180 msec) 150 msec	45 msec
Capacity:	10 MegaBytes 20808 Blocks 10,653,696 Bytes	34 MegaBytes 69632 Blocks 35,651,584 Bytes
Price:	\$999	\$1999

¹The IBM PC version requires a separate interface card.

The Trustor 30 is shown at right. The 10H takes up less than 1/2 the space of the Trustor 30.

+

= Increased Productivity Through Your More Powerful 512K Apple III!

ON THREE Presents. . .

For everyone who has wished for more memory in their **Apple III** or **Apple III Plus** - here it is!

The **ON THREE 512K Memory Upgrade** is a simple replacement memory board, and all programs running under SOS will work with it. How would you like your Visicalc (regular and Advanced version), **III E-Z Pieces**, Applewriter, Business Basic, Selector **III**, Catalyst and others to have about 450K to work with?

If you have ever run out of room with a huge spreadsheet model, the **512K Memory Upgrade** is just what you need. Just think of the forecasts that you could create with your **512K Apple III**! If you have ever filled memory working with an **Apple III** program like Visicalc or **III E-Z Pieces**, the **512K Memory Upgrade** will give you the room you need. The extra memory will give your Visicalc or **III E-Z Pieces** spreadsheets room for the largest model that you can imagine.

How would you like to be able to type PRINT FRE in **Apple III** Business Basic and the response that comes back is: 467452. That's over 456K of available space in Business Basic. With that much room, the **Apple III**'s version of Basic is one of the most powerful on the market.

Have you ever had problems putting some programs on your ProFile hard disk while running under Catalyst? Since Catalyst takes up a good portion of memory, there are times when there isn't enough memory to go around. Many programs will not run at all under Catalyst because of memory limitations. Some programs will run only on minimal Catalyst systems. That means no spooling, no special purpose utilities like ONTIME

or the Calendar-Pak, and a lot of dynamic driver loading. Who needs problems like this? With the **512K Memory Upgrade**, your problems with programs not fitting while running under Catalyst will be solved. You will be able to put Lazarus and Draw ON under Catalyst and have your Draw ON pictures being printed out while you undelete a file with Lazarus or even work on your wordprocessing with Applewriter or Word Juggler. The BPI system and all other large programs such as Keystroke will now fit easily under Catalyst.

Included in the **512K Memory Upgrade** package is a diskette that will check your memory for any errors, thus giving you confidence that your **512K Memory Upgrade** works correctly. In addition to the confidence program, we are including a new disk drive for your **Apple III**—a RamDisk drive! This disk drive is simply a new device driver that takes a portion of your **512K Apple III**'s memory and uses it as an ultra-fast disk drive. If you want, you can add this driver to your disks to store and retrieve information at lightning fast speeds. Using one of the popular program switching utilities like Selector **III** or Catalyst, you can use the RamDisk for quickly storing information that you need to transfer from one program to another.

The **512K Memory Upgrade** is the single most exciting thing to happen to the **Apple III** in a long, long time. Using state of the art 256K memory chips, the board is very simple to install and even easier to use. The **512K Memory Upgrade** will NOT take up an expansion slot as it is a simple board swap-out. Just keep on using your existing programs—you don't have to change them! Visicalc, Advanced Visicalc, **III E-Z Pieces**, Applewriter, Business Basic, Pascal, Catalyst, Selector **III** and many other programs will automatically have about 450K of memory to work with.

The **ON THREE 512K Memory Upgrade**

is specially priced at only **\$499!!**²

The **512K Memory Upgrade** includes. . .

- 1) An **Apple III 512K Memory Board** using state of the art 256K memory chips.
- 2) The **Confidence Memory Program** which will ensure that your **512K Memory Board** is working correctly.
- 3) The RAM ultra-fast **RamDisk** drive with demonstration programs.
- 4) The **Upgrade to 512K Utility** that will update all of your disks so that they will work with the memory upgrade, and the updated version (1.2) of the **System Utilities** program that permits larger SOS.DRIVER files.
- 5) **Complete** instructions for installation and use.
- 6) A full **90-day Warranty**

*The **ON THREE 512K Memory Upgrade** can only be used on a 256K **Apple III** or an **Apple III Plus**. If you have an old 128K **Apple III**, the upgrade costs \$549 + shipping (there is no rebate), and it must be installed by a dealer or by **ON THREE**. We offer same day turnaround on 256K or 512K memory upgrades and charge only \$50 plus shipping for the installation.

²The purchase price of the **512K Memory Upgrade** is \$549 plus shipping. After installing the new **512K Memory Board**, return your old 256K memory board to us and you will get a rebate of \$50.

LAZARUS///FILE RESTORATION

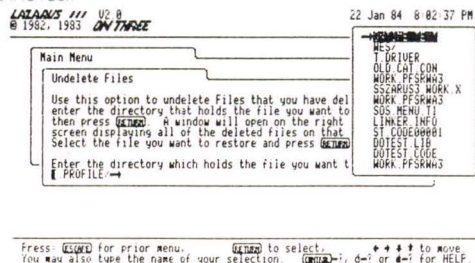

It's been a long day and you're tired. Just a few more sentences and you'll be finished with that long report your boss wants on his desk tomorrow morning. Just as you are about to save it, you press the wrong key and your last 10 hours of work are erased from the disk. What do you do? If you have **Lazarus III** from **ON THREE** it's simple! Just press a few more keys and voila! your file is restored to original condition. If you don't have a copy of **Lazarus**, well-there's always the unemployment office.

Introducing Lazarus III...

If you have ever accidentally erased a file from one of your disks and have wished for a little magic to bring it back, **Why Don't You Have A Copy Of Lazarus?** This extremely easy to use utility will restore any file that you have accidentally deleted from any of your disks. It will work with **ProFile**, **The Micro-Sci A3, A143**, our **TruStar** hard disks and every other disk drive that you can connect to your **Apple III**. If you can save a file on it - or delete a file from it, **Lazarus** can restore your little accidents.

To restore (undelete) one or more files, you simply tell **Lazarus** where to look and press **RETURN**. **Lazarus** will look for deleted files on that disk and show you a window filled with the files that you can undelete. Just select the one you want, press **RETURN** and **Lazarus** does the rest!

Lazarus is so easy to use, that no matter what experience you have with your **Apple III** you will be able to use it. If you are working with an **Apple III**, you need **Lazarus**. Almost half of the people who order **Lazarus** pay for next day shipping costs because they have to have it **NOW**. Why don't you order your copy of **Lazarus** now - before you need it.

Lazarus III requires an **Apple III** or **Apple III Plus** with a minimum of 256K and is available for only \$49.95 + \$2 for shipping and handling. **Lazarus** is not copy-protected and may be installed under **Selector III** and **Catalyst**.

Other Products From ON THREE...

This four page flyer is much too small to show you all of our software and hardware products for the **Apple III** and **Apple III Plus**. Please call or write for complete product information and pricing. Some of the specials we are currently offering are as follows:

ON THREE O'Clock

Calling all you time conscious **Apple III** owners out there! How would you like a working **clock/calendar** for your **Apple III**? Did you know that your **Apple III** has provisions for a built-in clock/calendar? With a clock, your **Apple III** can function more efficiently and make your life easier. Just as was originally intended (and built-into the **Apple III Plus**, the **ON THREE O'Clock** kit comes complete with a plug-in clock chip with battery backup and easy to follow instructions.

With an **ON THREE O'Clock** installed, whenever you save or modify a file, the current time and date will be stored on disk. Thus, you will now be able to tell which file you last worked on. Your programs will automatically use the **Apple III** built-in time and date routines to give you an up to the second read-out of what time it is.

Extremely easy to install and adjust, it is completely compatible with **SOS** and doesn't use up a slot! This is the one you have been waiting for! The package contains comprehensive instructions and a **Six Month Warranty**. Try to get that deal anywhere else! For only \$49.95 (plus \$3.00 for postage and handling) you can get the best little clock in town. We offer quantity discounts, so please call before placing a volume order.

ONTIME

The **ONTIME** package from **ON THREE** is an incredible new enhancement to your **Apple III** system (with an **ON THREE O'Clock**) or your **Apple III Plus**. While you don't need **ONTIME** to use your **Apple III** clock, as soon as you have it you won't know how you were able to live without it. Before **ONTIME** the only way you could find out the time from within most programs is if you looked on your watch!

ONTIME, the incredible new product from **ON THREE**, will conquer this problem by giving you **Apple III** many great new features: With the **ONTIME** driver installed, you can display the Time & Date whenever **YOU** want it. A simple keystroke combination will turn the clock display on, and another will turn it off. One more turns on a stopwatch that can count down by tenths of a second! This is very useful in monitoring how long you've been on the telephone, or using a computer service like the Source.

The best part about **ONTIME** is that it operates in the 'background' - continuously displaying the Time & Date while you are doing something else. Thus, you can be working on your spreadsheet, typing a letter with your word processor or even printing out a financial report and **ONTIME** v. continuously update the Time & Date information on the screen.

Coming soon are add-on utilities to **ONTIME** that will give you a **Calendar**, **Calculator**, **Notepad**, **Communication Package**, a **Spelling Checker for III E-Z Pieces** and more. All of these add-on utilities will also work in the background. You will be able to press a button to jot down some notes to yourself while you are working with some other program like Visicalc. You will also be able to use the **Calendar** to set your week's schedule of meetings. When the time comes for that meeting, the computer will prompt you, from within whatever program you're working in. With the communications utility you will be able to send files using a modem from within the program you are using!

All of these utilities will be shortly available for the **ONTIME** package. **ONTIME** is currently priced at only \$39.95 (plus \$2.00 for postage and handling). **ONTIME** requires an **ON THREE O'Clock** or equivalent to work. If your **Apple III** doesn't already have a clock, you can purchase both the **ON THREE O'Clock** and **ONTIME** combination for only \$79.90 (plus \$4.00 for postage and handling). That's ten dollars off! If you have been waiting for a reason to get a clock - **ONTIME** is it!

Please call or write for availability of the **ONTIME Version 2** which has a built-in **Calendar**, **Calculator**, **Notepad**, **Communications Package**, a **Spelling Checker for III E-Z Pieces** and more. Current users of **ONTIME** will be able to directly upgrade to Version 2 at low cost.

ON THREE

The Company For All Of Your Apple III Needs

is growing and we're moving to a larger location. For those concerned **ON THREE Magazine** readers, another issue will follow this brochure very shortly. To keep bringing you innovative quality products at very low prices, we have had to postpone the magazine in the past. Now that we have our hardware and software engineers in place, we can continue to bring you new products for the **Apple III** - and the magazines that are just as valuable.

All future correspondence and orders should go to our new office location:

ON THREE

4478 Market Street, Suite 701-702
Ventura, California 93003

ON THREE Presents . . .

Draw ON III is a powerful and versatile graphics tool designed exclusively for the **Apple III** and the **Apple III Plus** computers. **Draw ON III** transforms your **Apple III** into a combination drafting table, easel and sketch pad. **Draw ON** works in all of the **Apple III**'s Color and Black/White graphics modes and brings the power of **MacPaint** to your **III**.

Features such as rubber banding of lines, user adjustable grids, built-in help screens and easy to follow menus make **Draw ON III** the ONLY graphics package for the **Apple III** that is both powerful and easy to use. Combined with an excellent (**Apple** styling) instruction and tutorial manual, you can be doing useful work in less than an hour. The only limit as to what you can do with **Draw ON** is your imagination.

Draw ON gives an individual the power of a graphic arts studio. Use it in creating charts, preparation of slides and tables for presentation, and letterhead design. With **Draw ON** you can make changes to the dull graphs

Draw ON III Graphics Tool

that your other programs create by adding borders, textures and different typefaces. Even **Computer Aided Design** (CAD) applications such as circuit layouts, drafting and flowcharting are now possible on your **Apple III** with **Draw ON III**.

Draw ON combines powerful cut and paste facilities with the ability to mix text (in a variety of sizes and styles) with your drawings. If you don't like any of the text fonts or objects that come with **Draw ON** you can design your own! You can label your drawings with these fonts or even use them in your other programs. You can pick up objects and expand, shrink, rotate, invert

Optional Equipment

Cursor III Joystick, **Apple Mouse IIe** or **Apple II Graphics Tablet** (**Graphics Tablet** version costs \$50 extra), **RGB Color Monitor**, **Dot Matrix Printer**.

A **PKASO** or **PKASO/U** interface card is needed if you don't have an **Apple DMP** (or **C. Itoh Prowriter**), **Imagewriter** or **Epson (MX, RX or FX)** printer. You must specify the printer and interface card you are using before ordering.

Draw ON requires an **Apple III** or **Apple III Plus** with a minimum of 256K and is available for only \$179 + \$5 for shipping and handling. **Draw ON III** is not copy-protected and may be installed under **Selector III** and **Catalyst**.

and texture them. You can also zoom in on a particular portion of the screen to do detailed work.

To control **Draw ON** either a joystick, mouse or the keyboard is used. Since there are no mice available for the **Apple III**, **ON THREE** has enabled **Draw ON** to use the **Apple IIe** mouse and interface card. If you would like the ease of use that the mouse provides, purchase an **Apple IIe** mouse and follow our instructions for installing it in your **Apple III**. **Draw ON** is so versatile, it will work directly with the **Apple IIe** mouse, no modifications are needed for using it in the **Apple III**. We also support the **Apple II Graphics Tablet** with **Draw ON III**.

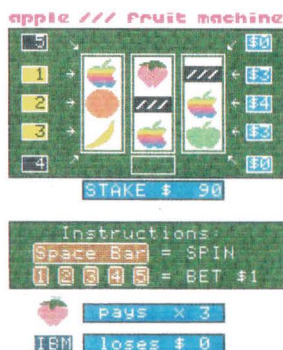

After creating your chart, table or other piece of art you will probably want to print it out. If you have an **Apple DMP** (or **C. Itoh Prowriter**, **Imagewriter** or **Epson (MX, RX, or FX)** printer, **Draw ON** can print out your drawings directly. For those of you who don't have these more popular printers, **Draw ON** also works with all of the printers the **PKASO** and **PKASO/U** interface card support. This includes **Centronics**, **Epson**, **NEC**, **Okidata**, the **IDS Prism** and **IDS Color Prism**. To print out color drawings you will need the **IDS Color Prism** printer and the **PKASO** interface card.

The Apple III Fruit Machine

For everyone who doesn't have the time or money to hop a plane to **Las Vegas**, we have the **Apple III Fruit Machine**. Superb full color graphics gives the **Fruit Machine** the feel of a real **Slot Machine**. Arcade style and effects add to the excitement.

Winning big is just a pull of the handle away. Get your copy today-and tomorrow, well the **French Riviera** beckons . . .

The **Apple III Fruit Machine** requires a minimum 128K **Apple III** or **III Plus** and is priced at only \$19.95 + \$2 for shipping and handling.

The Apple III Card Machine (Blackjack)

After you win big on the **Fruit Machine** you can try your hand at the **Card Machine**. The **Card Machine** is a realistic simulation of the game of **blackjack**. Full color graphics makes this an exciting and challenging program.

You can even use the mouse to control the action of the game. Now, if you could only break even...

Each of the multi-colored face cards was created with the **Draw ON III Graphics Tool**.

The **Apple III Card Machine** requires a minimum 256K **Apple III** or **III Plus** and is priced at only \$24.95 + \$2 for shipping and handling.

SPECIAL OFFER: Order both the **Fruit Machine** and the **Card Machine** today for only \$39.95 + \$3 for shipping and handling.
